Portfolio: kreesh-ma.github.io/portfolio

PROFESSIONAL SUMMARY

MCA graduate who's shipped two full-stack computer-vision projects. Built a biometric voting platform with AES-256 encryption and a 3-stage face-recognition pipeline, published in IJSART (2026). Followed it with a real-time wellness dashboard over WebSockets at the CodeStorm 2026 hackathon. Comfortable across OpenCV, dlib, TensorFlow, and MySQL.

TECHNICAL SKILLS

- **Programming:** Python, C, C++, Object-Oriented Programming
- **Web Development & Backend:** Django, Django Channels, ASP.NET, MySQL
- **ML & Computer Vision:** OpenCV, dlib, face_recognition, TensorFlow/Keras
- **Security:** AES-256, SHA-256, Django Password Hashing (PBKDF2)
- **Tools:** VS Code, Git & GitHub

PROJECTS

E-Voting System Using Face Recognition

2026

Python · Django · MySQL · OpenCV · TensorFlow · face_recognition · Haar Cascade

- Built a Django/MySQL e-voting web app with 3-stage AI booth verification: person detection (OpenCV DNN), mask detection (TensorFlow/Keras), and face recognition (OpenCV Haar Cascade + face_recognition).
- Secured votes with AES-256 encryption and SHA-256 hash verification, added QR code matching against voter EPIC numbers, hashed passwords with Django PBKDF2, and role-based session access for admin and voter accounts.
- Published in IJSART 2026 (Volume 12, Issue 04, ISSN: 2395-1052).

Wellness Signal Tracker

2026

Python · Django · Django Channels · OpenCV · dlib · NumPy · Chart.js

- Built a real-time facial-analysis dashboard over WebSockets (Django Channels) that scores screen fatigue live from blink rate, brow tension, and expression.
- Ran a server-side CV pipeline — YuNet (OpenCV DNN) face detection, dlib 68-point landmarks, Eye Aspect Ratio for blink detection, and brow-eye distance for tension — on 320×240 frames at ~15 FPS, with Chart.js rendering the score live.
- Built for the CodeStorm 2026 hackathon.

EDUCATION

Master of Computer Applications (MCA) — Anna University (CGPA 9.09)

2024 – 2026

(CGPA 9.09)

B.Sc. Information Technology — Madurai Kamaraj University (CGPA 6.5)

2021 – 2024

(CGPA 6.5)

CERTIFICATIONS

- Google AI Essentials & Google Prompting Essentials (**Coursera**)
- Foundation Course on AI Readiness (**IICT AI Skills House**)
- Python & SQL for Data Science (**Scaler**)
- DBMS, AI & Python for Data Science (**Infosys Springboard**)
- Responsive Web Design (**FreeCodeCamp**)
- PHP & MySQL (**Spoken Tutorial, IIT Bombay**)

VIRTUAL JOB EXPERIENCE (FORAGE)

- **Software Engineering – Wells Fargo:** Data modeling and software-engineering workflow tasks (Jun 2026)
- **Cybersecurity Analyst – Tata:** IAM strategy assessment and platform integration (Jun 2026)
- **Technology – Deloitte:** Practical coding and development tasks (Jul 2026)
